Connecting to our Wi-Fi network

Austin Health's guest Wi-Fi network is a freely available network for staff and public to use. If you have used our Wi-Fi before, you will automatically connect to the network each time you attend our health service.
You can easily access our Wi-Fi network while on-site by following the steps below:

Step 1. Connect to the Network
For Android devices open Settings, then Connections/Wi-Fi. Select AHW-Guest.

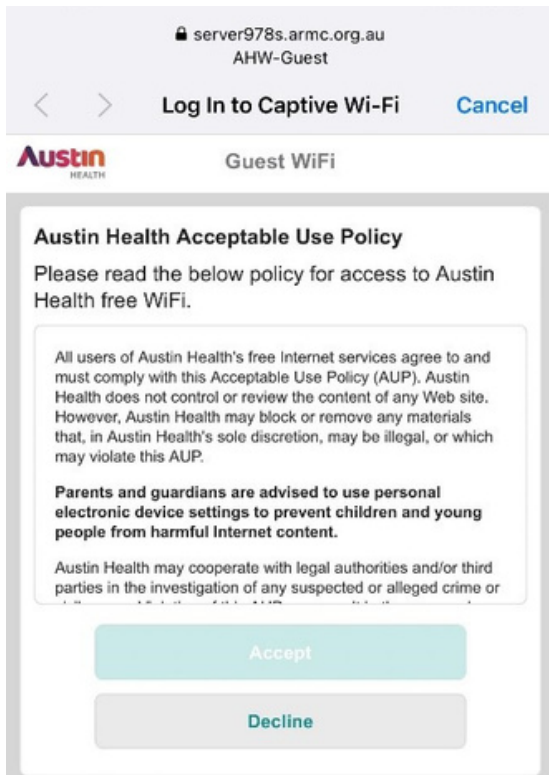

The device will attempt to connect as shown below. If this doesn't connect immediately, please try again.

Step 2. Open your browser

If you don't immediately get the following page, open a new window.

Step 3. Accept Austin Health's Terms & Conditions

Step 4. Use the Wi-Fi

Once connected, the Austin Health homepage will be displayed. This means you can begin using our Wi-Fi network.
